

# Cubit360

Intuitive, Space Saving, No Clamping Scanner  
for the Dental Laboratory and Dental Practice

## For Dental Technicians

Using our unique six degrees-of-freedom and clampless scanning, the Cubit360™ from Mimetrik™ offers the shortest time to complete upper + lower + occlusion scan available on the market.

## For Dentists

Due to its small footprint and portability, the Cubit360™ can be used as a chairside impression and denture scanner. Ideal for edentulous patients, and complex restorative cases.

## How does Cubit360™ work?

Hold the impression or dental model in front of the Cubit360 cameras

Rotate the scan object to create a 3D scan, using the live feedback on screen to ensure good scan coverage

Export the STL or PLY file. Now ready for CAD/CAM.

## How does Cubit360™ help?

“The Cubit360 digital scanner from Mimetrik will change everything for us – it’s the missing piece of the puzzle.”

“Cubit360 will completely transform the end result for patients, eliminating discomfort and improving retention.”

“The Cubit360 will also change the entire scanning experience for the professional team.”

**Steve Campbell**

UK Dental Laboratories Association (DLA)  
Immediate Past President, and Managing  
Director at Nexus Dental Laboratory, England.

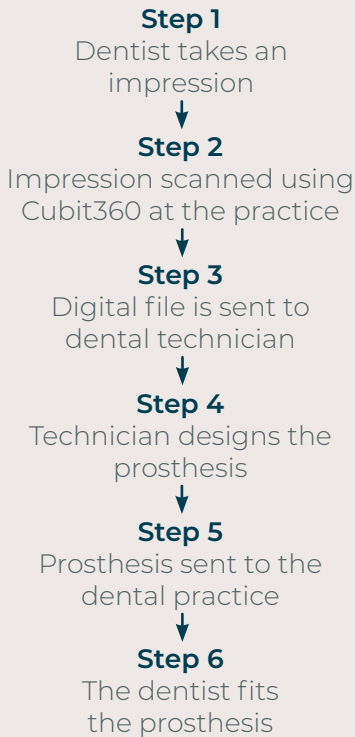

# For the whole clinical pathway

Cubit360 impacts your whole clinical pathway:

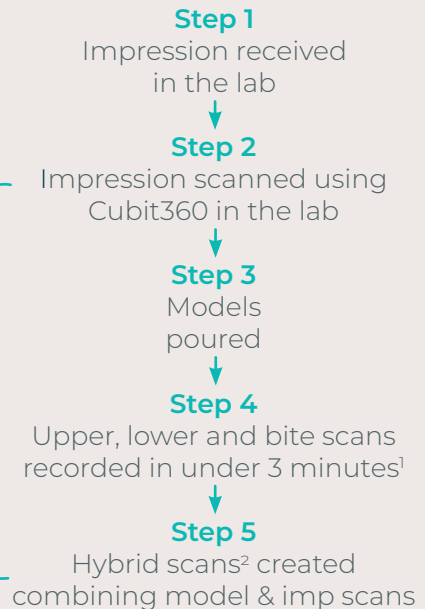

- Providing instant impression and model scanning
- Six degrees of freedom allows for optimal capture of impressions and large models
- Vastly simpler model bite scan
- Speeding up the entire workflow
- Making everyone's lives easier and more efficient

Built on our years of experience with digital technology in clinical practice... Mimetrik products are truly "designed by clinicians for clinicians"

## Cubit360™ Dental Practice Workflow

## Cubit360™ Laboratory Workflow

1. Clinical evidence shows current average total time for upper + lower + bite scans is >16.5 minutes.

# Cubit360

Speeding up your workflow, saving costs,  
and reducing environmental impact

## Six Degrees-of-Freedom

The world's only six degrees of freedom scanner, which enables fast and intuitive complete scan capture.

## AI Driven

Deep learning based automated artifact removal.

## Fast & Intuitive

Continuous, real-time scanning with no mechanical delays allow for the fastest scanning on the market.

## Instant Bite Scan

No need for cumbersome metal mounting frames. Our hand held approach allows for a more accurate bite scan in under five seconds.
